### SEC. 2. FINDINGS.

Congress finds the following:

(1) The number and severity of catastrophic events causing resource damage to Federal land has significantly increased over the last 20 years, and such catastrophic events also create serious adverse environmental, social, and economic consequences for Federal land and adjacent non-Federal land and communities.

(2) Catastrophic events often devastate forest or rangeland ecosystems and eliminate sources of seed for desired tree and plant species, which—

(A) delays or even precludes the reestablishment of appropriate forest or plant cover on millions of acres of Federal land;

(B) increases the susceptibility of the damaged land to wildfire and noxious or harmful species and reduces the economic value of the damaged land's resources;

(C) increases the susceptibility of adjacent undamaged land to insect infestations, disease, and noxious weeds;

(D) pollutes municipal water supplies and damages water delivery infrastructure;

(E) exacerbates sediment production that adversely impacts native fish habitat and soil productivity;

(F) results in unsafe campgrounds, trails, roads, and other infrastructure; and

(G) adversely impacts the sustainability of ecosystems and the well-being of adjacent communities.
